

Features

- Standard vacuum system hose connection sizes 1 1/2" or 2" diameter
- The screen may be periodically cleaned out via the quick-latching drop down access door with viewing window
- Prevent damaging vacuum equipment by locating a drop out box in each collection branch (hose connection point)
- Standard CVC drop out boxes are constructed of painted carbon steel. Stainless steel boxes are available as an option.

Industries:

Textiles, paper, tobacco, wood, plastics, agricultural & rubber dust applications.

Available Services:

- System Integration
- Industrial Ventilation
- Material Handling
- Power & Controls
- Manufacturing

Product Description:

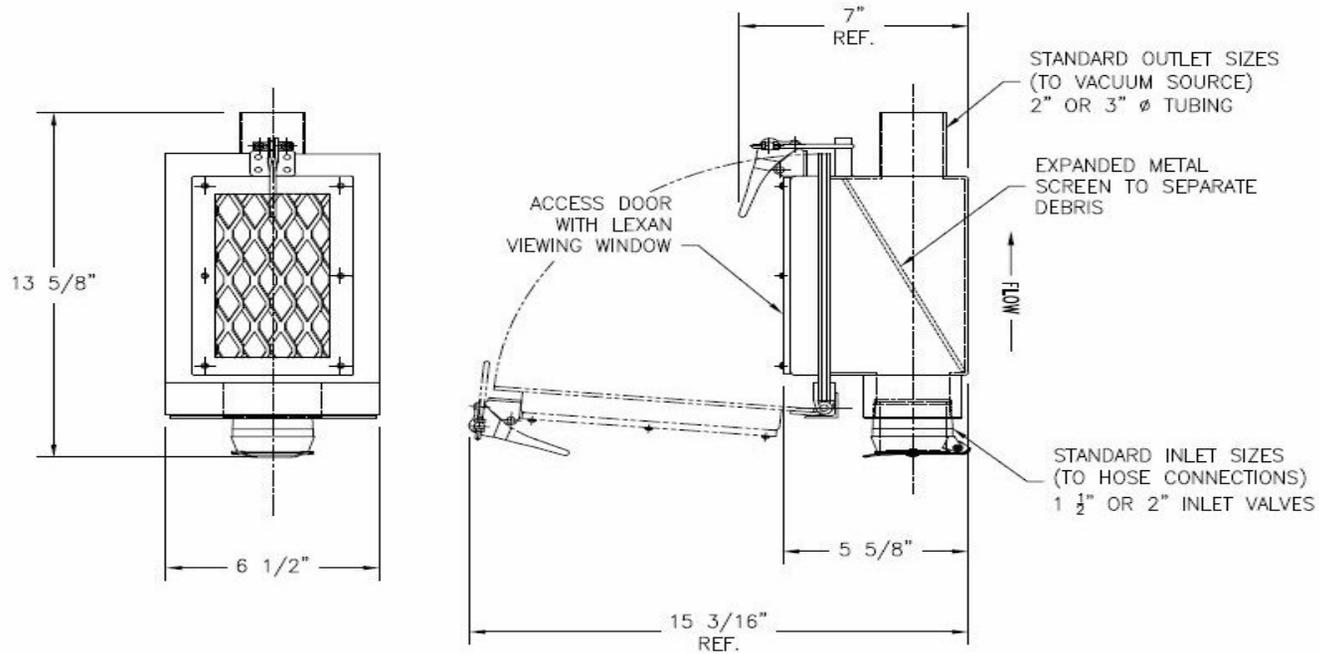

ATMOS360'S Central vacuum cleaning system drop out boxes are located at the end of each collection branch to prevent solid debris collected from damaging expensive vacuum equipment. An internal screen prevents debris from passing onto the equipment and can be periodically cleaned out via a drop down access door.
